Our 17 year history assures best practice in privacy, security and the ethical use of data

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantium has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

We all have a responsibility to use data for good

Quantium believes in using data for progress, with great care and responsibility. As such please respect the commercial in confidence nature of this document.

Executive summary

01 Task 1

1. Highest Revenue Segment
   Older Singles/Couples are the largest contributors to total sales. This segment represents the most valuable customer group.
2. Driver of Sales
   Sales are primarily driven by purchase frequency, not just spend per transaction. High-frequency buyers contribute more to total revenue
3. Premium vs Budget Behavior
   Premium customers have higher average spend per transaction. However, total sales are influenced more by number of transactions
4. Pack Size Preferences
   Larger pack sizes are preferred by: Families / bulk buyers. Smaller pack sizes are preferred by: Singles / casual consumers

02 Task 2

1. Successful Trial Stores
   Store 77 and Store 88 showed a significant increase in sales during the trial periodPerformance exceeded their respective control stores. Indicates the new layout was effective
2. Unsuccessful Trial Store
   Store 86 showed no significant difference compared to its control store. Suggests the trial was not effective in this location.
3. Driver of Performance Change
   Sales uplift in successful stores was driven by:Higher number of transactionsIncreased customer engagementNot necessarily higher spend per transaction
